Team-Build Revenue Sharing Project Plan

This is a "Very Unique" One-of-A-Kind Team-Build Rev-Share Project!

Below are the details of how the team-build and rev-share works!

... and how members can participate.

Our very first Rev-Share project is a company called Lifewave that has amazing products to improve your health including their flagship product X39 Stem Cell Patches.

We as a team created our master position in Lifewave, a "jointly owned account". We have built the foundation of our binary structure (two legs, a left and a right) below our master jointly owned position with a core group of 10 founding members starting with the Silver upgrade kit. (We only promote the \$300 silver upgrade kit as it includes several different sleeves/boxes with 30 Stem Cell patches which you can select the patches of choice during the registration/silver upgrade kit purchase)

We're building top to bottom left to right in the binary matrix using a referral link rotator. We add all silver upgraded member's referral links to the rotator for the new members and the entire team-build participants to promote the rotator link. This will ensure equality and absolute fairness which is intended to help everybody to get an equal number of referrals in our personal business centers.

NOTE: we will "Pause" your referral link in the rotator once you have one personal referral until everyone has at least one referral before we re-enable the referral links in the rotator again to help get additional referrals to build out YOUR business.

Everybody has to monitor their referral placements and alternate between left and right placements in the "Change Settings" in their back office to balance both left and right legs equally where possible.

There are two different ways to participate...

1. Sign-up as a Lifewave affiliate under a designated team-build member and purchase the silver upgrade kit.

(We may offer loans from time to time of up to \$100 to help people get started building their home-based business for themselves but by themselves)

2. If you wish to be a passive earner and not participate in the team-build you would contribute funds to our Co-Op funding pool. Our dedicated team utilizes those pooled funds to generate revenue to be shared with the participants. The minimum amount to participate passively is \$30, the maximum is \$200. The contributions can be made in either Bitcoin (BTC) and or in Bitcoin Cash (BCH).

Those who want to earn passively without having anything to do with the Lifewave company nor purchase the amazing US Patented Stem Cell patches can simply make money available by contributing to the co-op funding pool.

How does the rev-share project work?

Those who join the team-build as an affiliate at the Silver level or above will all equally share any and all commissions generated by the team to infinity for as long as they remain "Active" in Lifewave.

The participants that contribute either Bitcoin or Bitcoin Cash to our co-op funding pool will share the commissions up until their contribution amount is paid back plus 30% extra. (Providing there are commissions earned)

PLEASE NOTE: You must be in our Rev-Share Telegram channel to participate!

<https://t.me/cicoteambuildrevesare>

The commissions generated by the combined efforts of the team will be shared 50% by the team-build participants and 50% will be allocated to member 2 member contributions in the m2m project. This will keep the wheels spinning and cycling feeder matrix positions nonstop 24/7.

The commissions that members receive in their personal accounts "Do Not" have to be shared with the team.

Those who may wish to contribute part of their received commissions to the m2m project to accelerate the Ferris Wheels in the m2m project can do so at their own free will. Simply contact the dedicated member that is in charge of filling the member's matrix positions with "Duds" sending m2m contributions to cycle the feeder positions.

Anybody and everybody within our CICO Co-Op is welcome to join our "Unique", one-of-a-kind rev-share project.

Those wishing to join Lifewave as a customer to just purchase products as well as those that want to join as an affiliate at the "Recommended" silver kit level and participate in the CICO Rev-Share project "MUST" be given the team's rotator referral link to join.

The reason for that is to ensure fairness to all participating members and also to ensure proper and correct team-build placements into the unique Lifewave binary structure.

We look forward to you working with us to create your own "Real" long term income working your home-based business from the comfort of your own home.
